

## **GCVF Frequently Asked Questions**

### **1. What if the device I'm interested in isn't listed on the eligible devices list?**

Please contact the ministry with questions about specific technologies not currently included on the eligible devices list. The ministry considers certification by the EPA – SmartWay Technology Program or similar programs as an important criteria when evaluating which devices are eligible for funding.

### **2. How do I know if the vehicle I'm interested in is eligible?**

For general vehicle eligibility criteria, please consult the Program Guide. As part of the application review process, the ministry will confirm vehicle eligibility and the maximum incentive value.

### **3. Is there a limit to how much funding I'm able to apply for?**

There is no limit to the number of incentives that may be applied for. Payment of incentives will be subject to the availability of funds.

### **4. What happens if the manufacturer is not able to deliver my vehicle within the six month period?**

If the purchase is not completed within six months of the application being approved, a new application will need to be submitted. Under exceptional circumstances, applicants can contact the ministry to request an extension, which the ministry may choose to grant at its sole discretion.

### **5. How is the incentive amount calculated?**

For vehicles, the incremental cost will be determined based on the pre-tax value of the alternative fuel vehicle and its conventional equivalent. The specified percentage and caps will then apply.

For devices, the cost will be based on the pre-tax value of the device and installation costs. The specified percentage and caps will then apply.

Incentive amounts are deducted from the final purchase price, after all taxes are applied.
